## Outsource Your 3D Art and Animation

Animation and 3D services from NE India

Chillibreeze provides animation and 3D art services to companies located all over the world. All our design related work is done from Shillong, a veritable paradise. It is amazing that a lot of sophisticated and high end work is being outsourced to a relatively undiscovered place in North Eastern India. Truly, the world is flat!

CUSTOMER QUOTES

“We have been very pleased with Moa’s work with us. He has been professional and helpful in all of our endeavors. I’ve already recommended your company to an advertising exec in NYC who will be in contact soon. We look forward to an expanding relationship with the start of a new project in March.”  
 Chris Harris, Mapeasy inc.

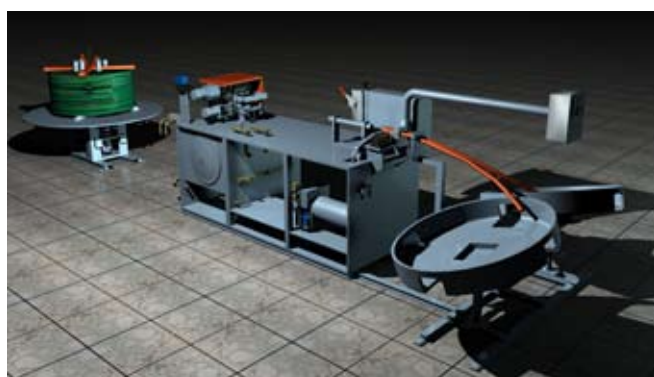

“Thanks for the wonderful animation. It is really much more than I had hoped for. I love how it revolves around the tree.”  
 Rich Miller, Pabulum Productions.

 Team

### industrial

Manufacturers and distributors of industrial machinery are discovering the potential of 3D. It is ideally suited to visualizing, training or sales.

Equipment manufacturers and distributors can use our services to create animations to present procedures for training, orientation, seminars or sales. We can create line diagrams or animations of complex procedures that would otherwise be tough or impossible to depict. At, Chillibreeze, we aim to simplify.

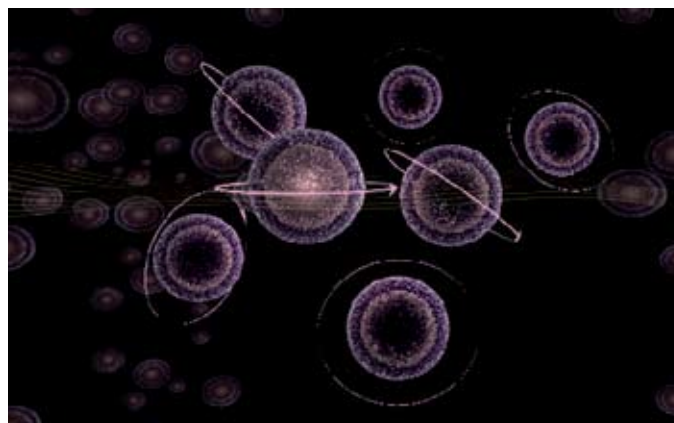

### broadcast & print ads

Advertisement agencies, broadcast companies, print houses, journal/ periodical publishers can benefit from our services. 3D is now widely used to produce logo animations, abstract animations, product design and visualization. We can create breathtaking visuals for you. At Chillibreeze, we aim to impress.

### scientific

Educational and research institutions can take advantage of our 3D services. We can create vibrant 3D images that can communicate complex scientific concepts in a comprehensible and interesting manner. Science can become much more accessible when it sounds uncomplicated. At Chillibreeze, we aim to elucidate.

### medical

Using medical graphics and animation is the best way to illustrate medical cases, procedures and devices that would otherwise be difficult to visualize. Medical Equipment manufacturers, distributors and medical specialists can use our 3D services to create animations, to present medical circumstances and to design procedures for training, orientations, seminars or print publications. You can have us create anything from simple line diagrams of medical conditions or devices to photorealistic images and animations of complex medical procedures. At Chillibreeze, we aim to illustrate.

**Maxon Cinema 4D review**  
 Moa Longkumer

If you'd been keeping track of the meanderings of the 3D industry, you'd obviously have noticed by now, that the quality of 3D media is directly proportional to how much money you're prepared to part with. By 3D media, I mean the end result of your hard work, in terms of imagery and video...occasionally games and perhaps, audio. Without argument, the yard sticks in the 3D community are Discreet's 3ds MAX © series and Alias Wave Front's MAYA©. Any new 3D product that surfaces, will have to face the prospect of an uphill knee-dance, against the industrial standards set by 3dsMAX and MAYA. There has been in, recent years, a deluge of 'easy/affordable' 3D applications flooding the market, and without doubt, some have proved to be pretty decent packages. Titles like Lightwave, 3DStudio, Rhinoceros, Softimage and Caligari True-Space for instance, have quite a formidable following against which, I dare not argue. Most, however, are not worth the trouble of even trying.
